Resource Classification

2 types of resources:

- organizations
- process roles

Resource Classification

Resource Management

2 mechanisms of resource management:

- **push control**

- task is assigned to a specific user by the system / supervisor

- **pull control**

- user can decide which task he will assign to himself

Organization Management

7

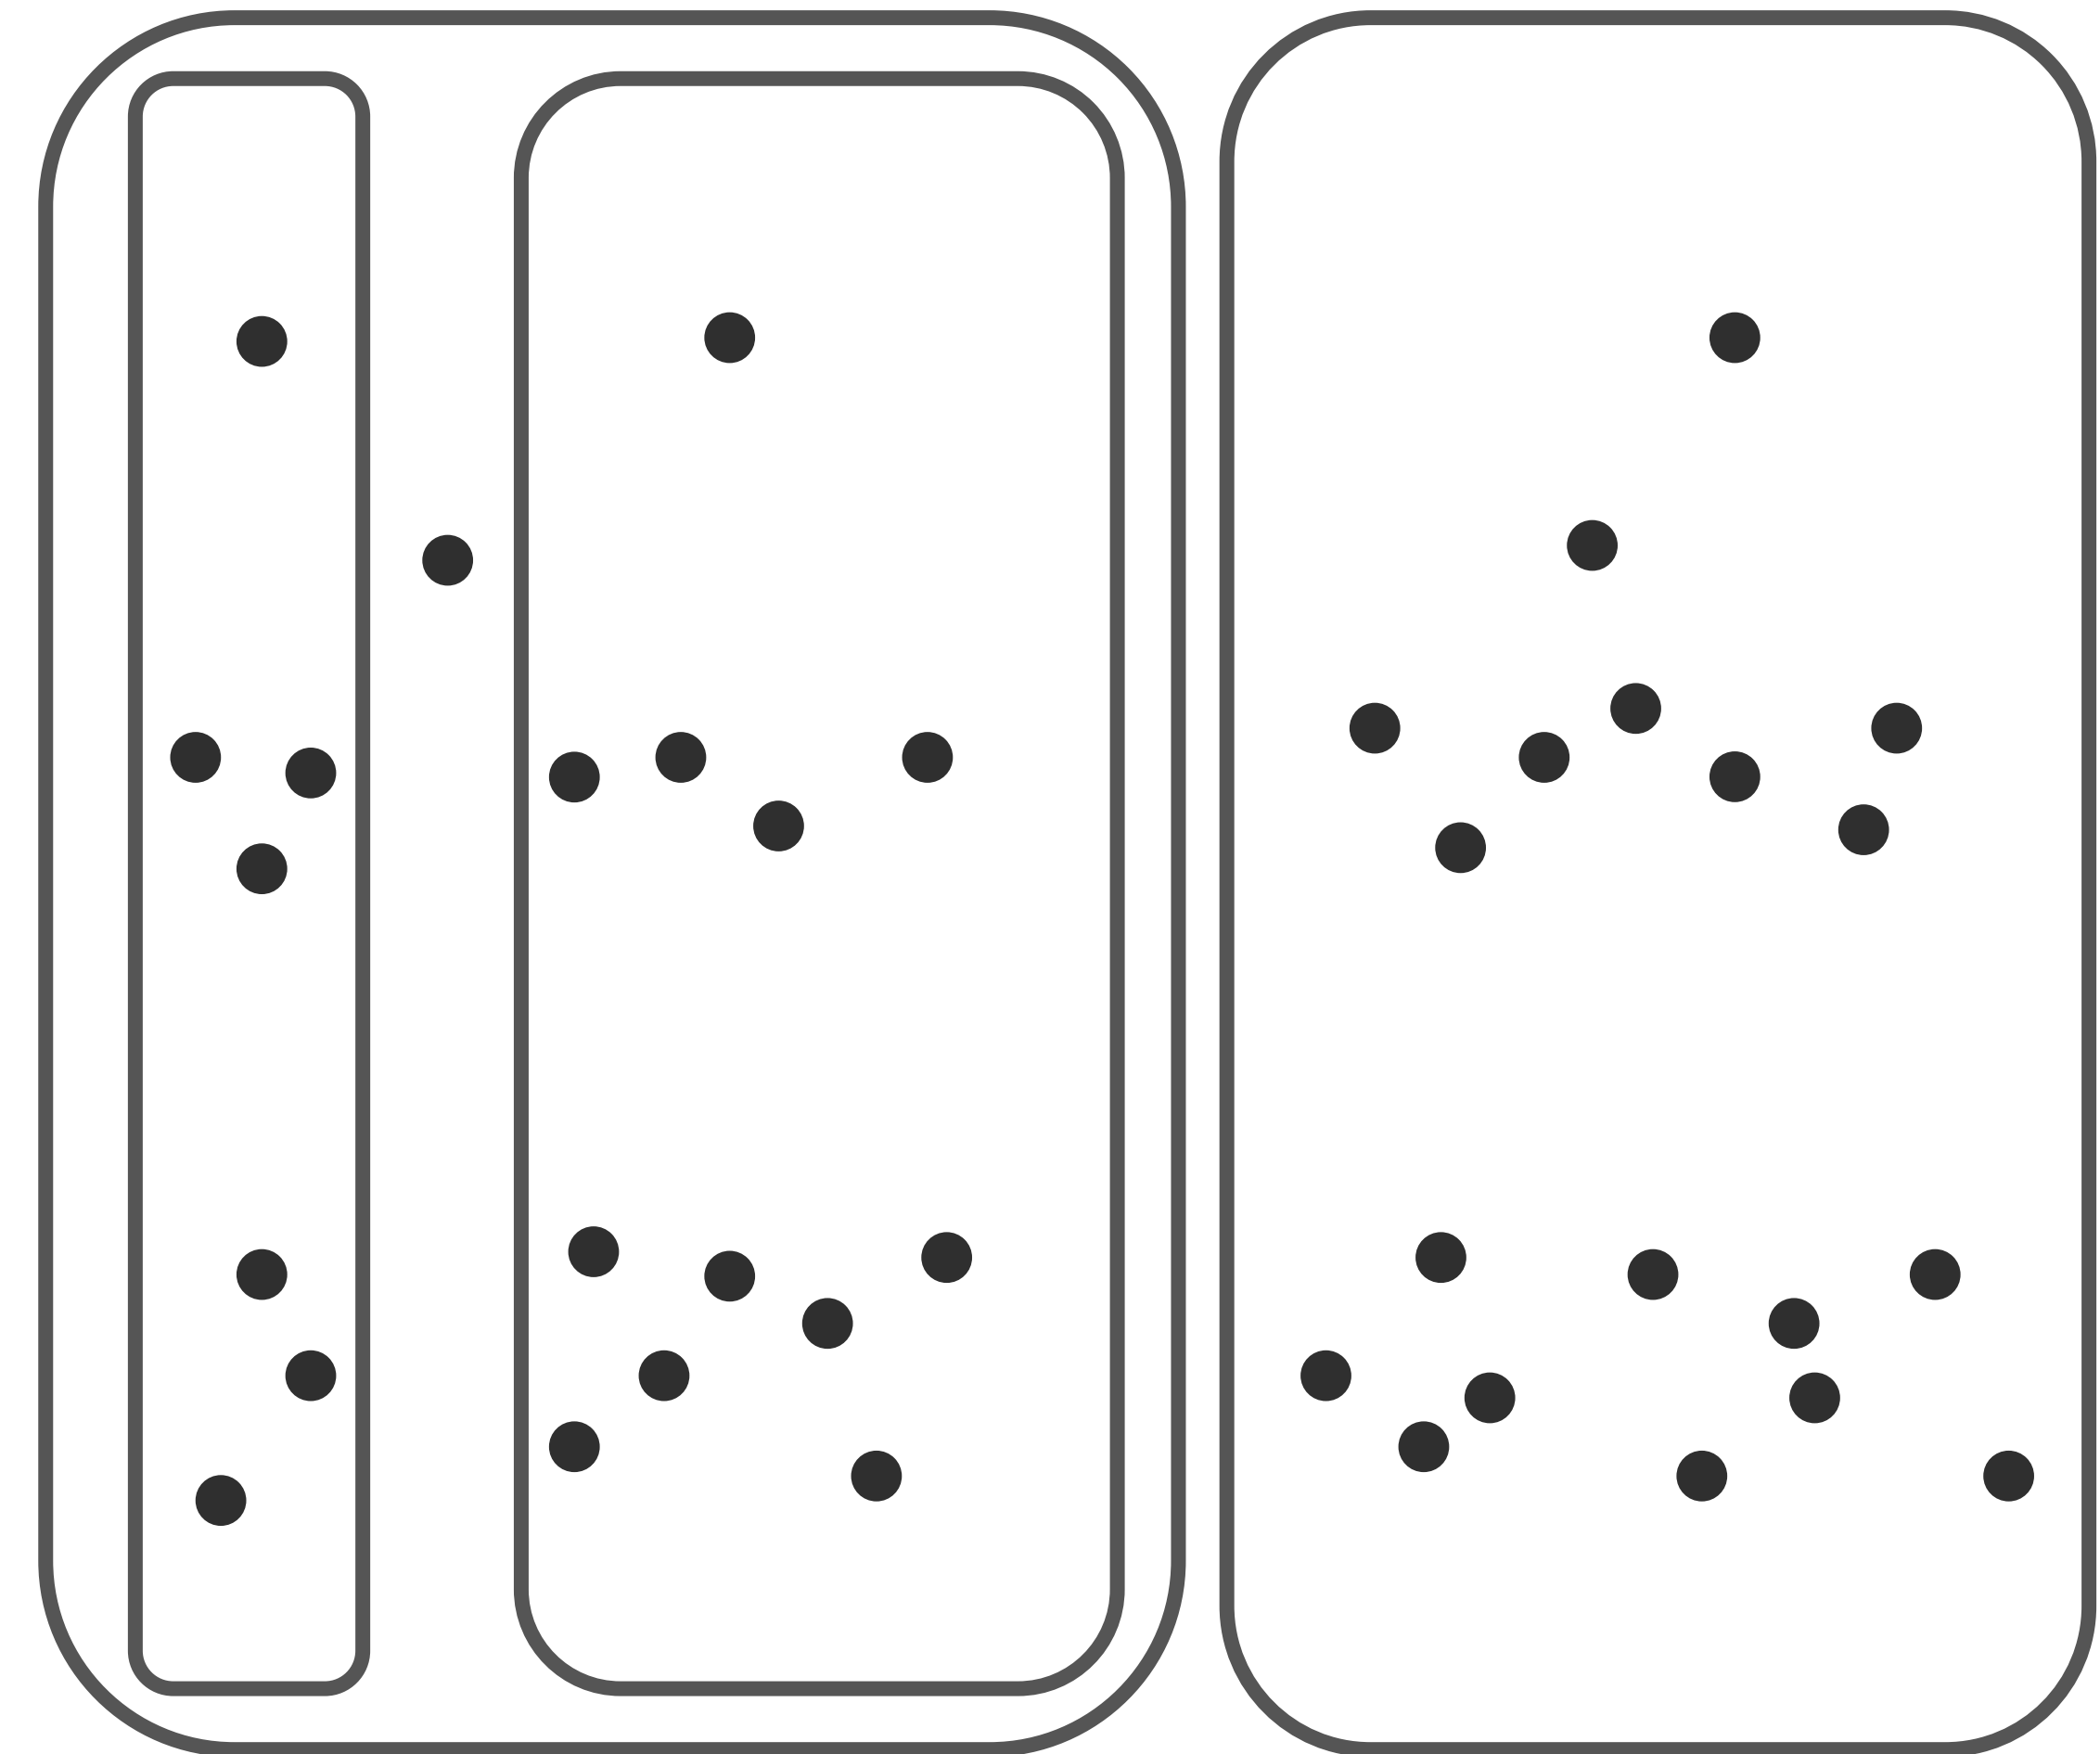

— Team 1 Team 2

Organization **groups**

- child groups
 - graph or tree structure
- members

Group **member**

- in different groups

Process Roles

- actor associated with the role can execute an activity (assign, delegate, etc.) on a task
- activities:
 - assign (pull control)
 - delegate (push control)
 - finish
 - cancel
